DETAILED ACTION

This is an Allowance for application no. 09/302,867 in response to applicant's amendment dated June 29, 2004.

Drawings

In order to avoid abandonment, the drawing informalities noted in Paper No. 3, mailed on June 4, 2004, must now be corrected. Correction can only be effected in the manner set forth in the above noted paper.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Craig Fieschko on September 3, 2004.

The application has been amended as follows:

In claims 1 and 19, please replace "(PRESENTLY AMENDED)" with "(CURRENTLY AMENDED)".

In claims 6 and 8, please add "additionally" immediately following compensator.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The present claims include novel and unobvious features in that the examiner was unable to find in several prior art searches. As shown in Figure 5 of US Patent 4,996,497 to Waehner, Waehner teaches a cable length compensator for use in a TV cable including a first end receiving the cable output signal from the cable, and a second end delivering a compensator output signal, the compensator out signal being substantially similar to the cable input signal. Waehner further teaches TV cameras provided with built-in circuits to compensate for common cable lengths (Col 1 Lines 58-67). Waehner teaches the adjusting of all the frequencies through one path (Col 5 Lines 10-15 and Lines 61-65, Fig. 5). Waehner does not teach a first path leading from the first path leading from the first end, the first path including a variable resistance. Waehner further does not teach a second path leading from the first end, the second path including a first variable resistance, and a parallel array of at least two capacitances. These features taken with the others in the claims define over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erick Rekstad whose telephone number is 703-305-5543. The examiner can normally be reached on 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Kelley can be reached on 703-305-4856. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
